

Supplementary information to the price list 2023

1 New in the range

Hawa Junior Acoustics and Hawa Porta Acoustics – available since May 2022!

Sliding doors now also provide perfect sound attenuation. The new top sliding hardware based on the successful and globally established Hawa Junior and Hawa Porta systems has enhanced the known strengths of sliding doors with a new quality: Effective sound attenuation.

They reduce the noise transmission from room to room by up to 41 dB. They also keep out kitchen odors, bathroom steam, drafts and light incidence with their innovative all-round sealing.

The associated increase in comfort is achieved without aesthetic compromises in design, thanks to integrated, invisible technology. And this is true in any structural or room situation, since both systems support both wall-mounted and pocket constructions with floor-to-ceiling applications.

2 Adjustments to product range

The articles affected by an assortment adjustment are marked with "x" (x = article in liquidation) in the price lists and contain corresponding notes.

3 Avis range adjustments

The following systems will be phased out in 2023. They will be regularly available until then.
